

# Process & Technology Consulting

## Competence in Recycling & E-waste Processing

**UrbanGold**  
recycling for a green future

*Your Partner for developing, designing,  
and realizing metal recycling projects*

- ✓ Objective recommendations
- ✓ Disburden the on-site staff
- ✓ Third opinion from external experts
- ✓ Independent expertise and analysis
- ✓ Obtaining an in-depth basis for decision making
- ✓ Trustful cooperation
- ✓ Estimate and state CAPEX & OPEX

**BENEFIT**

It is not sufficient to know that something will occur – we need to know when and why. It is essential to understand the background of a process and raise awareness for the fundamental influences and interrelationships.

Listening to and understanding **customers' challenges** is the basis for fruitful and profitable cooperation. Sometimes it is important to get an outside view from an independent consultant, not caught up in daily work routine. Our objective approach is to discover **sustainable solutions and improvements** for your business – starting from small optimisation projects, up to complete process & facilities re-design.

Check

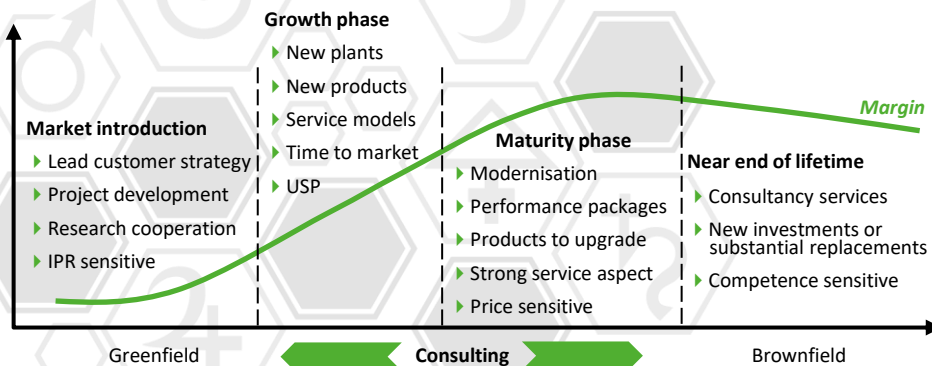

Evaluate

Recommend

Our services in the field of Process & Technology Consulting are:

- ✓ **Fitness Check:** on-line questionnaire, on-site expert clarification, deficiency and weak spot identification
- ✓ **Technical Analysis:** joint target definition and detailed analysis; evaluation of equipment performance, quality level, and operational bottleneck; recommendations for performance increase
- ✓ **Inquiry Specification:** detailed specification and investment budget evaluation
- ✓ **Evaluation of documents:** Third opinion on technical studies, inquiries, and proposals

**SERVICES**

We are the ideal partner for:

- ✓ Project development including technical, economical, and financial evaluation
- ✓ Both integration of single technologies and complete Greenfield projects
- ✓ Tuning and modification of plants, as well as cost and quality optimization
